

COASTHILLS CREDIT UNION COMMERCIAL

PROJECT NARRATIVE

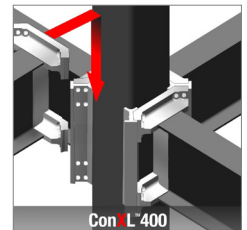

This 102,000 ft², three-story commercial office will be the new CoastHills Credit Union Headquarters in Santa Maria, CA, the heart of California's Central Coast. The design includes a new branch location, corporate office space and a 300-seat auditorium and meeting space. This building is designed to meet LEED Silver certification standards.

CONX SOLUTIONS

The long, brace-free spans afforded by the ConXL 400 System gave ample space for the tall ceilings and large, voluminous space in the first-floor auditorium. Additionally, the ConXL 400 columns provide an ideal structural solution for a unique feature: three-lanes of drive-thru ATMs, tucked neatly under the side of the building.

PROJECT DATA

Square Footage	102,000 ft ²
Steel Assembly Duration	18 Days
Number of Collars	117
Bay Spacing	30'x30'
Structure Weight	568 tons; 11 lbs./ft ²

STAKEHOLDERS

Owner	CoastHills Credit Union
Architect	Arris Studio Architects
Engineer	John A. Martin & Associates/ConXtech
Contractor	Specialty Construction
Steel Fabricator	ConXtech Manufacturing
Steel Erector	ConXtech Construction
ConXtech Scope	Structural Steel, Metal Deck, Engineering
