

KAISER PERMANENTE EVERETT  
HEALTHCARE

PROJECT NARRATIVE

A four-story, 165,000-square-foot outpatient surgery center recently added to the existing 73,000-square-foot building. The expanded facility includes primary and specialty care, surgical services, an ambulatory surgery center, 24/7 urgent care, imaging, lab, and pharmacy services — all in one convenient location.

CONX SOLUTIONS

Our prefabrication and modularization are featured heavily in the steel structure, exterior envelope, interior partitions, and operating rooms. The design also takes advantage of repeat elements in the clinic floors to drive productivity and a consistent patient and staff experience.

KEY PROJECT DATA	
<b>165,000</b> Square Feet	<b>15</b> Days to Erect Steel

STAKEHOLDERS

Owner	Kaiser Permanente
Architect	HoK
Engineer	KPFF
Contractor	Mortenson
